

PANDA POD – FULLY MOTORISED POOL & SPA LIFT FACT SHEET

The Pool Lift Companies Panda Pod is our top of the range portable pool lift.

Fully motorised and simple to use due to its innovative features. Thanks to the control helm with automatic traction, no efforts are required by the operator, who just needs to steer the lift into place.

The Panda Pod offers maximum safety due to its 8 safety levels.

Simple to use, together with industrial quality hydraulics make this product a market leader.

PANDA POD IS EQUIPPED WITH 8 SAFETY LEVELS:

1. Manual emergency operation system in case of electric failure
2. Automatic braking system integrated into the wheel
3. Safety braking system by means of automatic stopper when approaching the pool edge
4. Infrared ground detector
5. Safety motion system by means of vertical bar switch off point
6. Anti crush system on bars
7. Emergency button
8. 2 point safety harness (4 and 5 point optional extra)

BLU POD SPECIFICATION:

- Lifting capacity 145 kg
- Max arm travel: 1500 mm
- Depth of seat inside the water : 900 mm
- Time of lowering with weight: 25 sec.
- Time of lifting with weight: 18 sec
- 2 speed automatic handling
- Autonomy: 100 working cycles
- Automatic helm, forward motion by up and down control lever
- Rotating drive wheel radius: 200°
- Hydroelectric box
- Manual emergency operation system in case of damage to electric system
- Automatic braking system integrated in the wheel
- Safety braking system by means of automatic stoppers to prevent from excessive approach to the water
- Infrared ground detector
- Safety motion system by means of vertical hem switch off
- Battery 24V
- Battery charger
- Battery charge level indicator and emergency button
- Zinc coated steel frame + 180° powder coating finish
- 2 point safety belt
- Headrest
- Removable leg holder
- Weight of lift : 260 kg
- 4 or 5 point safety belts (on request)
- Ground fixing kit (on request)
- Handset to control up and down movements (on request)
